**How to e-Prescribe**

**MANUAL PROCESS** *(it takes 5 days or more.)*

1. **Prescriber** writes a prescription on paper.
2. Patient loses the prescription and returns to the **Prescriber**.
3. **Prescriber** uses the eRx module to write a prescription (filling out the quantity, directions, diagnosis, etc.).
4. **Prescriber** selects a pharmacy. Checks status to see if the transmission was successful.
5. **Pharmacy** processes the prescription.
6. **Pharmacy** receives the paid claim.
7. **Pharmacy** fills the prescription.
8. **Pharmacy** contacts the **Prescriber** and/or the patient.
9. **Pharmacy** dispenses medication to patient.
10. **Patient** receives the medication.

**Start**

**Current Process**

**FINISH**

**NEW Process!**

**4 EASY STEPS WITH E-PRESCRIPTION** *(It takes less than a day!)*

1. **Prescriber** checks IEHP Formulary.
2. **Prescriber** uses the eRx module to write a prescription *(filling out the quantity, directions, diagnosis, etc.)*.
3. **Prescriber** selects a pharmacy. Checks status to see if the transmission was successful.
4. **Pharmacy** dispenses medication to patient.

**Start**

**FINISH**
