## Medication Reconciliation Program

Dear IEHP Provider,

**Medication Reconciliation** is a benefit IEHP provides to our **IEHP DualChoice members**, prior to post discharge from inpatient stay. This service allows for IEHP's pharmacist team to compare a member's new medication orders with all the medications they had been taking, prior to the member's inpatient stay.

Why is Medication Reconciliation important?

- Reduces hospital re-admissions when completed within 72 hours.
- Prevents medication errors.
- Greatly improves the health outcomes of our IEHP Members.

How it works:

1. IEHP's pharmacy team is informed of member's hospital admission.
2. Pharmacy team faxes a request to the member's assigned PCP for most current Medication List recorded at the PCP's office **prior** to inpatient stay.
3. Once we receive the Medication List, IEHP pharmacists will conduct a Medication Reconciliation review.
4. Completed Medication Reconciliation and Pharmacist Clinical Interventions will be faxed to the Member's PCP.

IEHP requests the Medication Reconciliation be reviewed with Members, during the post-discharge follow-up appointment, and documented with **CPT code 1111F**, verifying a Medication Reconciliation Post Discharge has been completed.

- **CPT code 1111F must be reported only once per hospital discharge within 30 days of discharge.**

On behalf of IEHP Pharmaceutical Services, thank you for providing excellent care to our IEHP members.
