Public Health Officer
Department of Public Health,
San Bernardino County

Chelsea Koski, MPH

Program Coordinator,
COVID-19 Vaccine Team
Department of Public Health,
San Bernardino County

Deborah Fillpot, OTD, MS

Interim Program Manager,
COVID-19 Program
Department of Public Health,
San Bernardino County

COVID-19 affects vulnerable populations more severely, causing greater illness among people of color. Preventive care and health education are less accessible to low-income people with pre-existing conditions and who catch COVID-19 and can die. People with hourly jobs or in low income areas cannot afford to stay home sick from work or take time off to visit a doctor or get tested. Marginalized communities frequently don't have equal access to healthcare.

This is why getting tested and vaccinated are vital to the health and economic stability of families, neighborhoods and entire populations. Learn how vaccines can help you stay healthy and reduce your chances of getting seriously ill or hospitalized.

IWIN is a non-profit affiliate of the San Bernardino County Medical Society.
