Inland Empire Health Plan

To: All PCPs
From: IEHP – Provider Relations
Date: August 16, 2018
Subject: **WPATH Transgender Training Opportunity**

Inland Empire Health Plan (IEHP) would like to share with you an upcoming WPATH Transgender training opportunity, “Best Practices in Transgender Health: Evidence Based Medical and Mental Health Care”. This event will be held at the Annenberg Center for Health Sciences at Eisenhower Medical Center on September 21-23, 2018 in Palm Springs, California. The conference agenda is attached for your review.

IEHP is pleased to offer interested participants WPATH Member rates. **This requires that you notify IEHP of your interest.** Rates for the WPATH Transgender training vary based on the number of days in attendance. For a complete list of rates, please see the attached agenda.

In addition, IEHP will also sponsor 5 registrations for this conference. If you would like to participate in the drawing, please fill out the enclosed form.

If interested in attending the training, please complete the information below and fax to IEHP Provider Relations Team at (909) 296-3550 by **August 31, 2018**. You will be provided with a special payment code to use during registration that will allow you to use the WPATH Member rates.

Presents

A WPATH Global Education Initiative Certified Training Series

Best Practices in Transgender Health: Evidence Based Medical and Mental Health Care

September 21 - 23, 2018 | Palm Springs, CA

Annenberg Center for Health Sciences At Eisenhower Medical Center
39000 Bob Hope Drive
Rancho Mirage, CA

WPATH offers our Global Education Initiative (GEI) certified training courses first and foremost to increase access to knowledgeable care providers for transgender people by training healthcare providers globally in the context and principles described in the WPATH Standards of Care and their implementation into practice. As the core curriculum for our WPATH certified provider program, courses are offered in an interdisciplinary, interactive, live format providing ample opportunity for networking and building referral systems.

GEI Best Practices Training Course Series

Foundations in Transgender Health is intended for providers of all experience levels and is the first step toward WPATH certification. This 2-day training course on the implementation of the WPATH Standards of Care combines healthcare professionals from all specialties, it focuses on the importance of an interdisciplinary care team approach and cross specialty foundational knowledge. We cover what all providers should know about gender development, mental health considerations, legal, policy and ethical issues, primary care and preventative health, puberty blockers and hormonal treatment, surgical overviews and much more. Includes interactive multi-disciplinary case studies.

Advanced Medical Treatment is a full-day training course that builds upon our multi-disciplinary Foundations Course curriculum and is the 2nd step for those pursuing WPATH certification. This course focuses on advanced hormonal treatment and complications, co-occurring conditions, general health, ongoing primary care and aging. A complicated case studies discussion helps to further understand care and treatment among multiple medical specialties.

Advanced Mental Health is a full-day training course that builds upon our multi-disciplinary Foundations Course curriculum and is the 2nd step for those pursuing WPATH certification. This course dives into advanced psychotherapy topics across the lifespan, navigating therapy issues like counter transference, children of transgender people, re-identification, autism, trauma and a complicated cases panel.

Workshops are highly specialized half day interactive and/or case-based sessions that focus on specific areas of interest. Workshops are part of our advanced track and intended for those who have completed the Foundations in Transgender Health course. Choose between Working with Children and Adolescents and Planning and Documenting for Medical Transition.

Topics include:

- Working with Children and Adolescents
- Planning and Documenting for Medical Transition
