

To: IEHP Credentialed OB/GYN Providers
Date: February 27, 2019
Subject: **New OB/GYN Payment for Performance (P4P) Program**

To better support high quality perinatal care, IEHP is revising its Pay for Performance (P4P) program for network OB/GYN Providers. The new P4P program supports three important goals:

- Supporting evidence-based care during pregnancy and the postpartum period,
- Reducing maternal health disparities, and
- Decreasing the administrative burden on participating Providers by reducing additional forms/paperwork and relying solely on claims submission to capture P4P events.

The following perinatal care measures that comprise the new OB/GYN P4P Program will be incentivized beginning on **July 1, 2019** dates of service.

NEW OB/GYN P4P Measure	Summary of Specifications
Initiation of Prenatal Care	Initial prenatal care visit completion during the first trimester
Tdap Vaccine	Administered once during pregnancy between 27-36 weeks
Perinatal Chlamydia Screening	Performed once during pregnancy
Perinatal Depression Screening	Performed once during pregnancy or the postpartum period
Postpartum Visit	Occurring once 21-56 days after birth
Postpartum Blood Pressure Screening	Completed once within 10 days after birth, for women with a birth hospitalization complicated by a hypertensive disorder in pregnancy
Postpartum Diabetes Screening	Glucose tolerance test performed between 42-56 days after birth, for women with a birth hospitalization complicated by gestational diabetes

IEHP’s current OB/GYN P4P programs and practices (e.g., pregnancy notification forms, Pap test) will be **retired** effective July 1, 2019 dates of service.

Program incentive dollars will be administered directly by IEHP through the IEHP claims submission process. A detailed program guide and in-person meetings describing the revised OB/GYN P4P measures will be provided prior to program launch. If you have any questions related to IEHP’s Pay for Performance programs for OB/GYN providers, please contact **IEHP’s Provider Relations Team at (909) 890-2054**.

Sincerely,
