Wednesday, April 29, 2020
Noon – 1 p.m.

Register for the webinar:

This webinar will cover the importance of, and opportunities for, maintaining trauma-informed connections with patients using telehealth during the COVID-19 emergency.

Speakers:

Dayna Long, MD, FAAP – Pediatrician and Medical Director, Center for Community Health and Engagement, UCSF Benioff Children’s Hospital Oakland;
Co-Investigator, Pediatric ACEs Screening and Resilience Study (PEARLS),
Bay Area Research Consortium

Erika Roshanravan, MD – Family Medicine Physician
Hansen Family Health Center, Woodland, CA

Lisa James – Director of Health, Futures Without Violence

Tanya Schwartz, MSW, MPP – Principal and Senior Director, Harbage Consulting

The physician speakers will share opportunities and guidance for providing trauma-informed care via telehealth as well as resources providers can offer to patients to help mitigate the impact of COVID-19 related stress on physical and mental health. This is particularly critical for patients who have experienced, or who are currently experiencing, Adverse Childhood Experiences (ACEs) or other adversities. Futures Without Violence will share resources providers can offer to patients who are experiencing domestic violence.

This is the third in a series of monthly educational webinars that offer practical information for primary care and behavioral health providers on providing trauma-informed care.

Information about the webinar series and recordings can be found on the ACEs Aware Educational Events webpage. For the latest information, follow us on Twitter, Facebook, and LinkedIn.

About ACEs Aware

The Office of the California Surgeon General and the state Department of Health Care Services are leading a first-in-the-nation statewide effort to screen children and adults for Adverse Childhood Experiences (ACEs) in primary care, and to treat the impacts of toxic stress with trauma-informed care. The ACEs Aware initiative is built on the consensus of scientific evidence demonstrating that early detection and evidence-based intervention improves outcomes. The bold goal of this initiative is to reduce ACEs and toxic stress by half in one generation, and to launch a national movement to ensure everyone is ACEs Aware. For more information, visit www.ACEsAware.org.
