

## FREQUENTLY ASKED QUESTIONS FOR IEHP PHYSICIANS

### **Q. How will my patient benefit from the center?**

*A. The center offers many programs and services in a non-clinical setting, helping your patient regain lost abilities, such as speaking, motor skills and mobility. Mixing fun and support, the center also helps your patient regain confidence and independence. Your patient receives all this – at no cost.*

### **Q. Which of my IEHP patients could qualify for the center?**

*A. Those who have been diagnosed with a stroke or traumatic brain injury – and live within 30 miles of the center.*

### **Q. Will I still be involved in my patient's care?**

*A. Yes. The healthcare team at the center will work closely with you, creating a treatment plan and updating you on the health and progress of your IEHP patient when the need arises.*

### **Q. How can I enroll my patient in the center?**

*A. Contact the center. Ask about obtaining the referral form and authorization form. After the center receives the signed forms, they contact your patient to set up an evaluation visit. (No need to send anything to IEHP).*

### **Q. How often will my patient attend the center?**

*A. About twice a week.*
